ITP and QBIT Release Android Lucid Mobile Apps.

App developers: The University of Queensland QAAFI Biological Information Technology (QBIT) and USDA-APHIS Identification Technology Program (ITP).

App partners: California Department of Food & Agriculture, Colorado State University, Delaware State University, Florida Department of Agriculture & Consumer Services, North Carolina State University, Southern Plant Diagnostic Network, University of Florida, and University of California.

PH Quads initiative: the Lucid Mobile project is a 2013 “Plant Health Quadrilaterals Initiative”.

The Identification Technology Program (ITP) team, in cooperation with The University of Queensland's QAAFI Biological Information Technology (QBIT), is pleased to announce the release of 10 Lucid Mobile apps for Android phones and tablets. These apps are available at no cost by searching on the text "USDA APHIS ITP" through Google Play (Google Play USDA APHIS ITP).

The Lucid Mobile apps were created from existing Lucid keys contained within ITP's identification tools (<http://idtools.org/>).

The 10 Lucid Mobile apps will be available early next year for your iPhone and iPad
